

The Michigan Society of Histotechnologists offers two workbooks to aid in preparation for the ASCP examinations: one for the student studying for the HT/HTL certification, and one for the histotechnologist studying for the QIHC (ASCP) qualification. Additionally for the supervisors, a Competency Assessment Manual is available that assists in planning a competency testing program customized for their histology laboratory's unique needs.

HT/HTL Study Workbook\$25.00/copy

This workbook provides an organized, in-depth system to guide the student in preparing for the HT or HTL (ASCP) registry examinations. Effort has been made to include all aspects of the theory and knowledge required for the examinations.

QIHC Study Workbook\$20.00/copy

This workbook will help histotechs prepare for the QIHC (ASCP) qualification exam. Just released, this workbook includes all the information that could be on the test starting with a reading list, and covering basic immunology, specimen handling, detection systems, epitope retrieval, staining, and lab operations.

These books can be purchased online at: www.mihisto.org
